EDUCATION

Bachelor of Science in Computer Science + Economics

08/2022 – 05/2026 | St. Louis, MO, USA

Washington University in St. Louis

GPA: 3.65 | Student Groups: NSBE, ColorStack, WashU - Robotics, Google Developer Groups

Skills

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express.js, Vite, LangChain, ChromaDB, Microsoft Azure, GitHub Actions CI/CD, MongoDB, MySQL, Axios, Google Gemini API, Google Generative AI embeddings

PROFESSIONAL EXPERIENCE

Fullstack Software Engineer Intern

05/2025 – 08/2025 | St. Louis, MO

MLS - Saint Louis City Sc

- Deployed a **RESTful API server** built in **Node.js**, **Express.js**, and **MongoDB** on **Microsoft Azure**, integrated with **Microsoft Graph API** to automatically manage employee permissions across internal apps, eliminating 90% of manual onboarding input.
- Built a responsive employee directory web app using **React.js**, **HTML**, **CSS**, and **Azure** (via **GitHub Actions** CI/CD), which automatically updates and visualizes all departments and enables the creation of distinct permission systems for separate internal apps.
- Implemented **centralized logging** and **automated notifications** in **Node.js**, ensuring 100% audibility of permission requests and approvals to support compliance and accountability.

AI Developer Intern

05/2024 – 08/2024 | Los Angeles, CA

Kai

- Created a conversational AI model in **Python** with **Google Gemini API**, integrated with user email accounts to generate **context-aware, multi-turn replies**, enabling automated handling of hundreds of daily messages.
- Designed and optimized a **Retrieval-Augmented Generation (RAG) pipeline** using **Google Generative AI** embeddings, **ChromaDB**, and **LangChain**, reducing AI model response time from 3 minutes to 1 minute and boosting user satisfaction by 30%.
- Developed **RESTful API endpoints** in **Node.js** with a **MySQL** backend, collaborating with frontend to ensure integration and showcasing to admissions teams to analyze high-volume email streams, providing visibility into sender patterns, flagged inquiries, and common requests.

Student Web Developer

02/2024 – 08/2024 | St. Louis, MO

Washington University in St. Louis

- Launched 2 faculty and event websites using **HTML** and **CSS**, delivering responsive, accessible designs that supported departmental academic and outreach needs.
- Accelerated project delivery by 30% by collaborating directly with professors and staff to gather requirements, iterate on designs, and refine site features.

PROJECTS & OUTSIDE EXPERIENCE

Medical QR

- Designed and built a full-stack medical records system in **PHP** and **MySQL**, enabling doctors to securely view, manage, and retrieve patient data with session handling and persistent storage.
- Developed responsive web interfaces with **HTML**, **CSS**, **JavaScript**, and **jQuery**, supporting login, registration, and dashboards with real-time PDF display, medical history visualization, and AJAX-powered data fetching.
